

INVITATION

LivaNova Satellite Symposium Seizure freedom in DRE

35th International Epilepsy Congress
Saturday 2nd September 2023, 15:30 - 17:00

We kindly invite you to participate in a Satellite Symposium organised by LivaNova on “Seizure Freedom in DRE”.

The symposium will bring together leading experts to discuss the different seizure-freedom definitions used in the literature and clinical trials and the importance of a uniform definition.

Our faculty will share the current data on the impact of seizure-free periods on quality of life (QoL) and key factors influencing QoL in drug-resistant epilepsy (DRE). You will also gain insights into the 1-year seizure-freedom rates associated with VNS Therapy™ and their impact on QoL.

A Q&A will be held after the faculty have spoken.

Join us

Liffey Hall 2 – Level 1

Saturday 2nd September 2023

15:30 - 17:00

The Faculty

Why a uniform definition of seizure freedom matters

Patrick Kwan

Professor of Neurology
Department of Neuroscience, Central Clinical School, Monash University
Consultant Neurologist
Alfred Hospital, Melbourne, Australia.

How Meaningful are Seizure-Free Periods for People with Drug-Resistant Epilepsy?

Lina Nashef

Consultant Neurologist
King's College London
United Kingdom

Is 1-year Seizure-Freedom a Meaningful Outcome Measure in Studies of Vagus Nerve Stimulation?

Maxine Dibué

Director, Medical Affairs
International Neuromodulation,
LivaNova
