

Inspired by patients.
Driven by science.

Join us for the UCB-sponsored symposium

Making a difference together for patients with developmental and epileptic encephalopathies

We are pleased to welcome you to this engaging and interactive symposium exploring the changing disease landscape of DEEs, with a focus on the lifetime journey experienced by patients diagnosed with Dravet syndrome and Lennox-Gastaut syndrome. Attendees are invited to actively participate in the symposium using worksheets that will be handed out as the session begins.

Monday, 4 September 2023
08:00–09:30 IST
Wicklow Hall 2, Second floor

Through exploring real-life clinical case studies, join us in navigating the patient experience from initial presentation through to adulthood by:

- Reviewing the best-practice approaches to delayed or rechallenged diagnoses
- Managing seizure and non-seizure family priorities
- Facilitating effective multidisciplinary support for patients transitioning to adult care
- Discovering the latest advances in treatment

Inspired by **patients**.
Driven by **science**.

Agenda

Monday, 4 September, 08:00–09:30 IST

08:00–08:05	Welcome and introductions (Chair) Prof Norman Delanty, Dublin, Ireland
